Zomato Restaurant Analytics — Executive Summary

Task 1 | EDA & Dashboard | Google Colab

46,137	3.70	2,918	2,915
Restaurants	Avg Rating	Locations	Cuisines

Overview: EDA of 46,137 Zomato restaurant listings across India using pandas, plotly, seaborn & wordcloud. Data cleaning covered missing ratings, malformed cost fields, and encoding issues. Ratings cluster between **3.5–4.3**; a moderate price–rating correlation (r = 0.39) was found. **BTM, Indiranagar & Koramangala** lead in restaurant density. French, Portuguese & European cuisines achieve the highest avg ratings, while North Indian & Chinese dominate volume.
